

# Give your IT team ***SUPERPOWERS!***

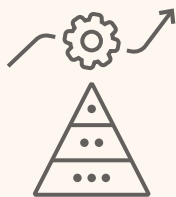

Get them a Wires Uncrossed  
***COMMUNICATION WARRANT OF FITNESS***

The clarity and quality of communication within an IT team ultimately determine its performance, the quality and timeliness of its delivery and even its morale.

When information flow is poor, people focus on the wrong priorities, struggle to connect their successes to the goals and vision of the company, and become isolated from their leaders.

Would you and your IT team benefit from a proven framework to improve communications?

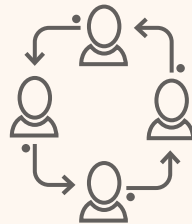

## ***OUTCOMES***

Alignment on what to do and why

Everyday use of a common language

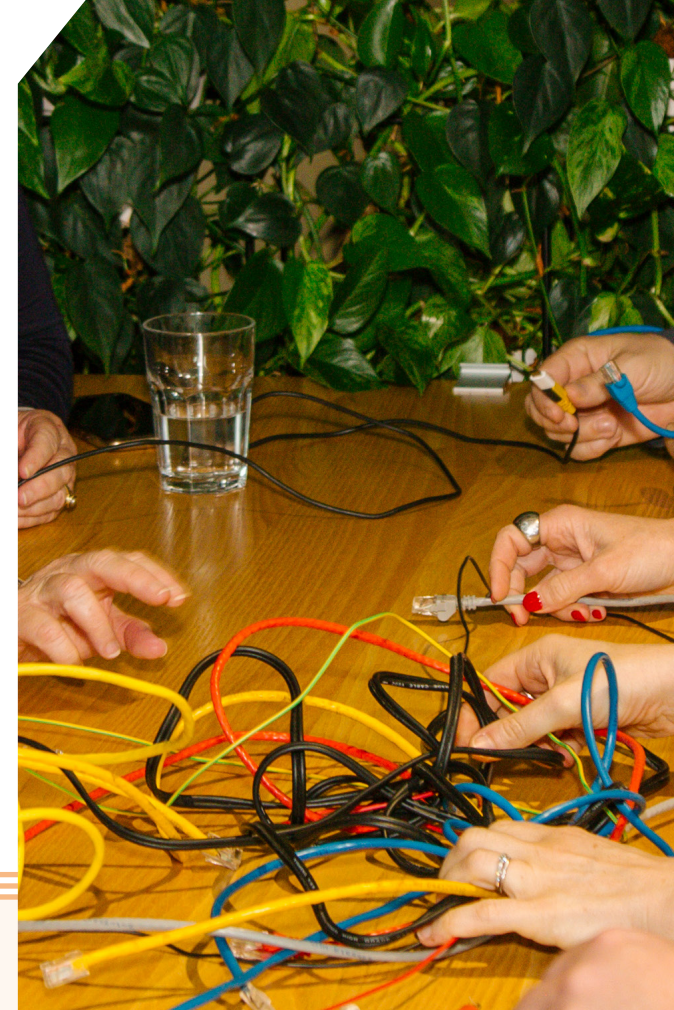

Smooth flow of information

Less time clearing up misunderstandings

## ***HELPING TECHNICAL TEAMS CONNECT***

Would you and your IT team benefit from a proven framework to improve communication?

# How it works

The Wires Uncrossed  
**COMMUNICATION WARRANT  
OF FITNESS** is a 90-day  
programme delivered in three  
distinct stages

## Stage 1 **DISCOVER**

We conduct one-on-one interview sessions with key leaders and team influencers, and we survey the full team. We capture a detailed understanding of how information moves within your team(s) today. We then analyse what works and what is in need of improvement.

## Stage 2 **PLAN**

Once we show you how information flows within your team right now, we'll work with you and your leadership team to identify the most effective ways to improve it. We give you the appropriate tools to fix weak areas and bolster strong communications pathways.

## Stage 3 **DELIVER**

We work with you to execute and embed these strategies. We build the framework and channels that allow a smooth and effective flow of information at the junctures where it is most critical.

Built on 20 years of experience with technical teams across a range of industries, with plenty of satisfied clients to vouch for our approach, the **Communication Warrant of Fitness** delivers results.

**Contact us to find out how we can help your IT team to communicate better.**
